MatrixCellect® 100

DBM Putty

MatrixCellect® 100 is a DBM putty derived from 100% allograft bone.

MatrixCellect® 100 Histology

MatrixCellect® 100 is a 100% DBM putty processed using CellRight Technologies® proprietary demineralization process. MatrixCellect® 100 has been histologically proven post sterilization to exhibit five elements of bone formation. MatrixCellect® 100 does not contain any extrinsic carriers and is entirely derived from 100% allograft bone. MatrixCellect® 100 is provided in a ready to use syringe or jar.

MatrixCellect® 100 is provided with a medical device Sterility Assurance Level (SAL) 10⁻⁶. The product should be stored at room temperature (15°C - 30°C), and has a shelf life of two years from the date of packaging.

MatrixCellect® 100 is indicated for homologous use for the treatment of surgically created or traumatic skeletal defects.

CellRight Technologies® employs strict quality assurance and quality control procedures to ensure patient safety.

CellRight's medical director, a licensed physician, performs an extensive medical review of the donor's medical/social history to determine eligibility. Only donors whose screening, serologic, and microbiologic tests meet or exceed the current standards established by the Food and Drug Administration (FDA) and the American Association of Tissue Banks (AATB) are accepted for transplantation.

MatrixCellect® 100 may be used in surgical procedures

including: · Spine

Reconstruction

Neuro

Foot & Ankle

Orthopedics

Dental

Trauma

SIZES AVAILABLE

Syringe or Jar

1 cc 2.5 cc 5.0 cc 10 cc

FEATURES AND BENEFITS

Osteoinductive - each lot is assayed

Osteoconductive

Sterile - Sterility Assurance Level (SAL) of 10-6

Two year shelf life

100% bone - no additional carrier

Ambient storage and shipping temperatures

Resists irrigation

Available in syringe or jar
